

Shubham Bansal

Full Stack Developer — MERN Stack — 1.5+ YOE

📞 7696133321 — ✉ sm325642@gmail.com — LinkedIn — GitHub

Summary

Full Stack Developer with 1.5+ years of experience building scalable MERN applications, including real-time systems and production-grade APIs. Skilled in React.js, Node.js, and performance optimization with a strong focus on user experience and clean architecture.

Technical Skills

Core: Data Structures & Algorithms, OOP, API Design, Performance Optimization

Languages: C++, JavaScript, TypeScript, SQL

Frontend: React.js, Next.js, Tailwind CSS, Zustand, Context API

Backend: Node.js, Express.js, Next.js API Routes, REST APIs, JWT Authentication

Database: MongoDB, MySQL

Tools: Git, GitHub, Postman, Vercel, Render

Experience

Tata Consultancy Services (TCS)

Nov 2024 – Present

Assistant System Engineer – Software Developer

- Built reusable React.js components, reducing development time by 25% and improving UI consistency across modules
- Optimized API data fetching and state handling, improving application responsiveness and reducing redundant requests
- Debugged production issues and improved system stability across multiple modules
- Collaborated with cross-functional teams to deliver scalable web features

Novem Controls

Jan 2024 – Jun 2024

Full Stack Developer Intern

- Built full-stack applications using MERN stack including authentication and CRUD APIs
- Designed responsive UI components using React.js and Tailwind CSS
- Implemented JWT-based authentication and handled API integrations

Projects

E-commerce Platform

Jan 2026 – Feb 2026

GitHub — Live

Tech Stack: Next.js, MongoDB, Tailwind CSS

- Engineered a full-stack e-commerce platform using Next.js with API routes, enabling seamless client-server integration
- Designed scalable REST APIs for authentication, product catalog, and order management
- Implemented secure checkout flow with cart management, address handling, and order processing
- Built admin dashboard for product and inventory management with full CRUD operations
- Optimized backend queries and state management, improving response time and user experience

Real-Time Chat Application

Sept 2025 – Oct 2025

GitHub — Live

Tech Stack: React.js, Node.js, Express.js, Socket.IO, MongoDB

- Built a real-time chat system using Socket.IO enabling low-latency bi-directional communication
- Implemented event-driven architecture for typing indicators, user presence, and message synchronization
- Designed backend to handle concurrent connections and efficient message broadcasting
- Developed secure authentication using JWT and REST APIs

Education

Punjabi University

2020 – 2024

B.Tech in Computer Science Engineering

Achievements

- Solved 300+ DSA problems across LeetCode, CodeChef, and GeeksforGeeks
- Built and deployed scalable full-stack applications with real-time and analytics features

Coding Profiles

- LeetCode: leetcode.com/u/sm325642
- CodeChef: codechef.com/users/shub_3006
- GeeksforGeeks: geeksforgeeks.org/user/sm325642
